

The Big Picture: Higher education institutions drown in paperwork every semester. ReportXpert gives universities their own private, personalized AI running directly on an on-premise **NVIDIA DGX supercomputer**. It acts as an ultra-fast digital registrar that reads university documents, catches mistakes, and compiles official accreditation reports in **5 minutes** — 100% offline with zero cloud leaks.

1. THE EVERYDAY ADMINISTRATIVE HEADACHE & THE FIX

✖ The Problem: Accreditation Nightmare

Every accreditation cycle (NAAC, NIRF, MDRF) brings campus operations to a grinding halt:

- Lost Proofs:** Certificates, grant letters, and exam marks trapped in paper folders.
- Spreadsheet Errors:** Mismatched formulas and human mistakes risk lowering grades.
- Faculty Burnout:** 50+ professors pulled from teaching for 4 months to manually type tables.

✔ The Fix: 24/7 On-Campus AI Auditor

ReportXpert functions as an always-on institutional compliance team inside the university servers:

- Drop Any File:** Resumes, PDFs, scans, and sheets are read and mapped automatically.
- Proactive Audit:** Validates research papers against Scopus and audits student-faculty ratios.
- Finished Dossiers:** 1-click generation of ready-to-submit official Word and Excel books.

2. WHY "PERSONALIZED & PRIVATE" ON NVIDIA DGX IS THE CRITICAL PILLAR

🔒 Absolute Data Sovereignty (Why Public AI Fails for Universities)

Air-Gapped Sovereign Enclave

Using commercial tools like ChatGPT risks leaking confidential student grades, faculty salaries, and unpublished patent drafts to foreign cloud servers. ReportXpert eliminates this risk completely:

1. On-Campus NVIDIA DGX

The AI runs entirely inside the university's physical server room on university-owned hardware.

2. Zero Internet Egress (0 KB)

The system operates 100% offline. Student records and exams never leave the campus network.

3. Natural Language Console

Deans and faculty can prompt the AI in plain English and receive instant, proof-backed answers.

3. THE INSTITUTIONAL TRANSFORMATION

AREA	BEFORE REPORTXPRT (MANUAL NIGHTMARE)	WITH REPORTXPRT (SOVEREIGN ON-PREM AI)
Faculty Time	50+ professors working late for 3 to 4 months	Completed in 5 minutes by on-premise AI
Research Tracking	Missing citations, uncounted Scopus publications	100% of papers, patents & grants automatically mapped
Inspection Day	Panic searching through drawers for paper certificates	Instant digital audit trail with 1-click links to proof
Data Privacy	Risk of data breaches by using public cloud tools	100% secured on campus on NVIDIA DGX hardware

ReportXpert // Core Capabilities & Daily Operations

How Faculty, Deans, and Committees Use the System Daily

SUPERCOMPUTER

1. FIVE CORE CAPABILITIES IN EVERYDAY ACTION

Faculty Profiles from CV / PDF

Auto-Profile

Upload any professor's resume (Word or PDF) or point to their web profile. The AI automatically parses:

- **Every research paper** (verified against Scopus & Web of Science).
- **Patents & grants** (DST, DBT, CSIR funding mapped with sanctioned amounts).
- **Academic Performance Indicator (API)** scores calculated automatically.

1-Click Accreditation Reports

NAAC / NIRF / MDRF

Inspection bodies demand both numbers and written explanations. ReportXpert writes both:

- **NAAC SSR (All 7 Criteria)**: Curriculum, research, governance, and infrastructure.
- **NIRF & MDRF Rankings**: TLR (Teaching), RPC (Research), GO (Graduation), OI (Inclusivity).
- Produces complete quantitative tables (QnM) and qualitative narratives (QIM).

Placements, Sports & Campus Events

Cross-Department

Aggregates non-academic achievements into verified ranking points:

- **Campus Placements**: Tracks packages, recruiters, and offer letters.
- **Sports & Cultural Trophies**: Reads event photos and certificates with Vision AI.
- **Community Outreach**: Verifies NSS/NCC extension work and student hours.

Dynamic Multi-Format Template Engine

Word & Excel

Different ranking bodies and committees require strict formats:

- **Official Word (.docx)**: Formatted with official university headers and styling.
- **Official Excel (.xlsx)**: Multi-tab workbooks with exact government column names.
- No manual formatting or column adjustments required by staff.

2. THE CONVERSATIONAL AI CONSOLE: ASK ANYTHING IN PLAIN ENGLISH

Everyday Questions University Leadership Can Ask

"Extract research metrics from Dr. Sharma's CV"

Extracts 18 Scopus papers, 2 granted patents, and ₹45L grant into faculty database.

"Compile NAAC Criterion 3.4 research dossier"

Generates ready-to-submit Word table of all 2024 indexed papers with verified DOIs.

"Calculate our NIRF 2025 student-faculty ratio"

Cross-checks enrollment against active faculty list, verifies 1:16.2 ratio with proof.

3. THE 3 LOCAL AI BRAINS POWERING THE SYSTEM

The Manager (Llama 3.2 3B)

Chat assistant that understands plain-English prompts from professors, coordinates tasks, and explains results.

The Deep Thinker (DeepSeek-R1 7B)

The strict auditor that checks math, searches for data anomalies, and ensures statutory compliance.

Deployment: On-Premise NVIDIA DGX Supercomputer Enclave
